# Your Guide to better skin

Medically Quality Assured  
&  
Proven to Solve Your Skincare Concerns

dermashield.co.uk

Nature provided you with a very efficient covering – your skin. Healthy skin is very effective as a first line of defence, but in today's environment where so many substances that irritate your skin are such an integral part of your everyday life your skin can surely use a little help in doing its job. Derma Shield moisturises, nurtures **and** protects your skin for up to four hours per application and also stays on despite repeated washing. It is non-greasy, hypo-allergenic, breathable and can be applied to any area of your skin.

- Your skin will quickly regain its suppleness as it receives an instant moisture boost. Derma Shield's formulation contains well known and safe moisturisers such as a refined grade of Lanolin and Glycerin that quickly sink into your skin and get to work right away.
- If your skin is damaged or has splits and cracks your skin's natural regeneration process is nurtured and enhanced by ingredients such as Aloe vera and vitamin E that are absorbed deep into your skin.
- Lastly, keep out any external irritants that might normally exacerbate sensitive skin 'flare up' as your skin will be protected by the high tech ingredients that are forming a breathable and waterproof shield which bonds to your skin and stays there for up to four hours.
- Although not guaranteed to protect the skin against every possible substance, Derma Shield has been clinically and laboratory tested and proven effective in protecting the skin against penetration by an extremely wide range of skin irritants.

And all this despite repeated washing and without your skin feeling greasy.

**Thank you for choosing to buy Derma Shield.**  
We are convinced that you will be absolutely delighted with your purchase and will soon, like many others, become a champion of Derma Shield and find yourself recommending it to all your family, friends and colleagues. After all, where else could you get a product that does so much for such a reasonable investment?

## The everyday solution

**Go about your day confident that your dry skin is being moisturised, nurtured and protected.**

Because Derma Shield is designed only to come off the skin as it sheds naturally, one application will last for four to five hours despite repeated washing.

**Improve your skin hygiene at work and home**

Derma Shield has a natural anti bacterial action that enhances any skin sanitisation method you use as it will continue to lower the colony count on your skin by a factor of ten for up to 4 hours.

**Stop any further aggravation of the sensitised skin and enable the skin to recover quickly.**

Derma Shield's microscopic shield ensures that, in most cases, any substance causing the skin to dry out is no longer in direct contact with the skin.

**Nurture the skin and help to keep it supple. Supple skin doesn't split – it stretches.**

To aid faster skin recovery, Derma Shield contains high-grade pharmaceutical moisturisers such as Aloe Vera and Vitamin E that are locked in to keep the skin supple.

## Derma Shield users...

Actors, Bricklayers, Cleaners, Dentists, Electricians, Farmers, Gardeners, Hairdressers, Industrial engineers, Janitors, Kitchen professionals, Lab technicians, Mechanics, Nurses, Occupational hygienists, Printers, Quantity surveyors, Railway workers, Swimmers, Teachers, Upholsterers, Vets, Window cleaners, X-ray technicians, Yard supervisors and Zoologists.

# Guarantee

We are so confident that Derma Shield will solve your skincare concerns that we offer an unconditional guarantee of satisfaction (when you purchase direct from us).

If for any reason Derma Shield does not meet your expectations then, within 90 days of purchase, return it to the address below together with a note of your name, address, receipt and brief reasons why you are unhappy. Upon receipt we will send a full refund of the purchase price.

Derma Shield is formulated to solve your skincare concerns – **Guaranteed**.

*This guarantee does not affect your statutory rights.*

## Medically Quality Assured

We are proud that our products bear the CE mark as a mark of quality. Derma Shield is manufactured in the UK to Medical Device Standard ISO 13485:2016, providing the structure to continuously meet your needs. We will ensure that you receive a safe, high-quality solution to your skincare concerns, every time.

Derma Shield has been clinically trialled and tested within the NHS and proven to improve skin complaints in addition to preventing irritant contact dermatitis.

# Trust Derma Shield to really help...

If you, or someone you care about (or have responsibility for) has dry, sensitive or damaged skin you can trust Derma Shield to help. Many sufferers of dermatitis have told us how beneficial Derma Shield has been to them. It is light and easy-to-use, contains no fragrances, is completely safe and, due to the high standard to which it is manufactured, it is unlikely to irritate your skin. However, as with all skin care products, especially onto sensitive or damaged skin, it is wise to do a patch test on your skin first.

## Itch scratch itch?

The itch scratch itch cycle is broken as the Vitamin-E and Aloe-Vera contained within Derma Shield sooth your skin.

## Where can you use it?

Derma Shield is gentle enough that it can be used on your face yet it is also tough enough to protect a pair of hard-working hands. Derma Shield is not designed to be used on mucus membranes nor within body cavities.

## How long will it last?

Derma Shield is designed to stay on your skin for up to four hours despite repeated washing. Derma Shield will come off as your skin naturally sheds.

## How safe is it?

Derma Shield is completely non-toxic and does not contain any steroids, therefore it can be applied as frequently as you like. See product and website for a full list of carefully selected ingredients.

## Let your Doctor know

Derma Shield is available on NHS prescriptions and although there are no restrictions on how it is prescribed, at the moment very few doctors are aware of it. Once you know how good Derma Shield is for you, we suggest you visit your doctor, show him or her the improvement of your skin and then request Derma Shield on NHS prescription.

Your doctor may not be able to find a reference within "MIMMS" or on their computer database. However, when you take your NHS prescription to your Pharmacist, they will be able to locate Derma Shield in the Chemist & Druggist list under PIP Code 219-3936. Your Pharmacist will then obtain it direct from us.
