How can we make your life easier? Please let us know how we can make it easier for you to trial Derma Shield. Telephone or email and we'll do our best to help you.

Results that speak for themselves...

Our Machine Shop personnel were very impressed by the way the oil and grease washed off with no bother!

JS - Senior Manager

We are currently using Derma Shield for protection of employees' hands during the manufacture of detergent powders. We have been able to return two employees back to their original jobs where minimal contact would have caused major skin problems. Their skin condition has improved very quickly.

JH - Occupational Health Nurse

The results were so beneficial in terms of cleanliness, efficiency, use and hygiene that I have decided to use only Derma Shield as the protective and cleansing material throughout my Workshops.

REK - Business Owner

Easy ways to try...

1

Medically Quality Assured & Proven to Solve Your Skincare Concerns

The solution ...that skin's been waiting for

Moisturises and promotes healthy skin

Derma Shield is a CE marked Medical Device, designed to maintain your skin's correct hydration levels whilst its vitamin E and Aloe vera ingredients encourage a healthy, smooth, supple, itch free outer layer.

You will find it light and easy to use

Derma Shield's laboratory and clinically tested formulation is applied as a mousse and quickly dries to leave your skin able to breathe and perspire normally.

Protects your hands and helps protect the environment

Derma Shield aerosols are completely CFC free and comply with all current European legislation.

Completely safe and non-toxic

We use only clinically tested, hypoallergenic, steroid and fragrance free ingredients so you can use Derma Shield on any skin area with confidence.

Safe to use in food preparation areas

Derma Shield may be used in food preparation areas as it is non-toxic and will leave no residue when handling foodstuffs.

Locks in nutrients to sooth and soften your skin

The unique formulation of Derma Shield contains several top quality emollients that quickly sink into your skin. However, unlike normal moisturising creams, Derma Shield's emollients are locked into your skin.

Non-greasy leaving you to undertake your daily tasks unhindered

Once applied, Derma Shield quickly dries to leave your skin feeling grease free and natural. You can continue with your normal daily routine without your hands feeling slippery or slimy.

One application will last for 4 hours

Because Derma Shield is wash resistant, it only comes off as your skin sheds naturally and is effective for 4 hours despite repeated washing.

Protects against exposure to possible irritants

Derma Shield provides a microscopic, undetectable protective layer over your skin. This layer will inhibit direct contact with most irritants that are a common cause of dry, itchy skin and irritant contact dermatitis.

Inhibits odours lingering on your skin

Derma Shield's microscopic protective shield helps repel strong odours from sinking into your skin. This means that a single wash, with a gentle soap, will leave your skin odour free.

Protects your skin from common hazardous industrial substances during your working day

Derma Shield's microscopic shield helps to protect your skin against oils, greases, petrol, diesel, dyes, paints, inks, resins, mastic, adhesives (including super glue), most solvents and general industrial dirt and grime.

Aids cleaning and hygiene at the end of your working day

Because Derma Shield inhibits external substances from sinking into your epidermis, cleaning your skin at the end of your working day is aided and dirty contaminants wash away more easily. Your hands will no longer look grubby with ingrained dirt and grime.

Provides emergency personal protection

Derma Shield does not replace personal protective equipment (PPE). However, if your PPE fails, or you get splashed unexpectedly, a pre-applied application of Derma Shield will provide temporary emergency protection against many acids and bases throughout the pH scale, including sulphuric, hydrochloric, nitric, phosphoric and citric acids.

View our online demonstration

See for yourself all the benefits and properties of Derma Shield. Our online video demonstration only requires an 8 minute investment of your time but Derma Shield will provide your organisation with staff health and safety protection for years to come.
